Notice of District AEC Performance Framework

CDE has approved the district-created AEC school performance framework. The district AEC SPF report has been appended to this notice in lieu of the state AEC report.

Additional information about the AEC accreditation process can be found in the following guidance document: www.cde.state.co.us/Accountability/Downloads/AECPolicyGuidance.pdf

## AEC: Improvement

All schools designated as an Alternative Education Campus (AEC) receive an AEC-specific SPF report that determines the plan type the school is required to adopt and implement. The plan type is based on the overall AEC framework score, which is a percentage of the total points earned out of the total points eligible in each performance indicator. The overall score is then matched to the scoring guide below to determine the plan type.
Plan Assignment Framework Points Earned
Performance
Improvement
Priority Improvement
Turnaround
at or above $47 \%$-below $60 \%$
at or above $33 \%$-below $47 \%$
points are calculated using the percentage of points earned out of points eligible. For AECs with data on all indicators, the total points possible are: 15 points for Academic Achievement, 35 for Academic Growth, 30 for Postsecondary and Workforce Readiness, and 20 for Student Engagement. Schools may not be eligible for all possible points on an indicator due to insufficient numbers of students. In these cases, the points are removed from both the points earned and the points eligible, so scores are not negatively impacted

## Alternative Education Campus (AEC) School Performance Framework Reports: Overview

All Colorado schools receive a School Performance Framework (SPF) report from the Colorado Department of Education (CDE) that annually reviews the performance of the public schools in the state. The SPF report determines the plan type that the school must adopt and implement.

Some schools have specialized missions and are designated as Alternative Education Campuses (AECS). These schools serve a student population where either: (1) all students have severe Some schools have specialized missions and are designated as Alternative Education Campuses (AECs). These schools serve a student population where either: (1) all students have severe
limitations that preclude appropriate administration of the state assessments, (2) all students attend on a part-time basis and come from other public schools where the part-time students are counted in the enrollment of the other public school, or (3) more than $95 \%$ of the students have either an Individual Education Program and/or meet the definition of a high-risk student, as defined in the Educational Accountability Act of 2009

Alternative Education Campuses receive a SPF report as all traditional schools do; however, they also receive an AEC-specific SPF report that determines their plan type. This AEC SPF report takes into account the unique purposes of the schools and the unique circumstances of the challenges posed by the students enrolled in the schools. The AEC SPF includes the required state measures defined in the indicators below, but may also include optional additional measures. These additional measures must be approved by CDE, but are selected by the district, with results provided by the district. Boulder Valley School District additional AEC academic measures include the Wide Range Achievement Test (WRAT), a paper-and-pencil administered standardized test of grade level mathematics and literacy achievement; Measures of Academic Progress (MAP), a computer-adaptive test of mathematics and literacy achievement; and the PLAN and ACT. Where available, three years of data are reported.

## What do the performance indicators measure?

## Academic Achievement

The Achievement Indicator reflects how a school's students are doing at meeting the state's proficiency goal: the percentage of students proficient or advanced on Colorado's standardized assessments. For AECs at BVSD, this Indicator includes results from TCAP, as well as MAP, WRAT, and/or PLAN. All these optional measures reflect academic achievement and are approved by CDE. Framework points earned on these measures are combined to arrive at an overall total by weighting each result by the number of student scores.

## Academic Growth

The Growth Indicator measures academic progress of students from year to year. For AECS at BVSD, this Indicator reflects student growth as measured by WRAT, PLAN, ACT, and/or MAP, all of which are optional measures approved by CDE. Framework points earned on these measures are combined to arrive at an overall total by weighting each result by the number of student scores.

## Student Engagement

The Student Engagement Indicator reflects a student's sense of belonging, safety and involvement in school that leads to academic achievement, regular attendance, and postsecondary and workforce success. For AECS at BVSD, this Indicator includes (1) average daily attendance and (2) truancy rates.

Postsecondary and Workforce Readiness
The Postsecondary and Workforce Readiness Indicator measures the preparedness of students for college or jobs upon completing high school. For BVSD AECs, this Indicator reflects student completion rates, graduation rates, dropout rates, and average Colorado ACT composite scores, where sufficient numbers of
students are available.

Colorado calculates "on-time" graduation rate as the percent of students graduating high school four years after entering ninth grade. A student is assigned a graduating class when they enter ninth grade, and the graduating class is assigned by adding four years to the year the student enters ninth grade.

For the AEC performance framework, schools earn points based on the highest value among the aggregated graduation rates. The aggregated graduation rates are the result of adding the graduation totals for all available years and dividing by the sum of the graduation bases across all available years
