Section I: Summary Information about the School

Directions: This section provides an overview of the school’s improvement plan. To complete this section, copy and paste the school’s Priority Performance Challenges, Root Causes and Major Improvement Strategies from Section III and IV of the 2015-16 UIP once it has been completed. In the UIP online system, this section will populate automatically as the UIP is written.

<table>
<thead>
<tr>
<th>Executive Summary</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Priority Performance Challenges:</strong> Specific statements about the school’s performance challenges (not budgeting, staffing, curriculum, instruction, etc.), with at least one priority identified for each performance indicator (achievement, growth, growth gaps, PWR) where the school did not meet federal, state and/or local expectations.</td>
</tr>
</tbody>
</table>

The percent of 3rd–5th grade students Scoring Proficient or Advanced on TCAP Reading has increased from 2012 – 2014 (29%, 34%, and 38%), but continues to be well below state expectation of 72%, and the percent of our K-3 students scoring At or Above Reading Level according to READ Act-approved assessments is 41%, which is 23% below the district average of 64%.

The Median Growth Percentile of 3rd to 5th grade students has remained stagnant in Reading, Writing, and Math between 2012 and 2014. With the exception of 3rd grade, ELL students on ACCESS are below the 65 MGP target.

<table>
<thead>
<tr>
<th>Why is the school continuing to have these problems?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Root Causes:</strong> Statements describing the deepest underlying cause, or causes, of the performance challenges, that, if dissolved, would result in elimination, or substantial reduction of the performance challenges.</td>
</tr>
</tbody>
</table>

Lack of high quality systems and structures for school leaders, teachers, and staff to use data in the organization of students and instruction in reading, math, and writing.

There is not school wide implementation with fidelity of reading instruction. There is lack of professional development, feedback, and coaching on instruction in reading.

Lack of school wide systems for effective planning for literacy and math.

| What action is the school taking to eliminate these challenges? |
### Major Improvement Strategies:

An overall approach that describes a series of related actions intended to result in improvements in performance.

<table>
<thead>
<tr>
<th>Major Improvement Strategies</th>
</tr>
</thead>
<tbody>
<tr>
<td>If we create and consistently implement a system of data-driven instruction, then there will be increased achievement.</td>
</tr>
<tr>
<td>If we design professional development on reading instruction that is consistently implemented and assessed for fidelity, then there will be increased achievement in reading.</td>
</tr>
<tr>
<td>If we establish a comprehensive, in-depth system of lesson planning, execution, observation/feedback for literacy and math instruction, then there will be increased achievement.</td>
</tr>
</tbody>
</table>

Access School Performance Frameworks here: [http://www.cde.state.co.us/schoolview/performance](http://www.cde.state.co.us/schoolview/performance)
Pre-Populated Report for the School

Directions: This section summarizes program accountability requirements unique to the school based upon federal and state accountability measures. Historically, this report has included information from the School Performance Framework; because of the state assessment transition and passage of HB15-1323, 2015 SPF’s will not be created. In the table below, CDE has pre-populated the school’s data in blue text. This data shows the school’s performance in meeting minimum federal and state accountability program expectations.

## Accountability Status and Requirements for Improvement Plan

<table>
<thead>
<tr>
<th>Summary of School Plan Timeline</th>
<th>October 15, 2015</th>
<th>An optional submission for review is available on October 15, 2015 for early feedback from CDE. For required elements in the improvement plan, go to the Quality Criteria at: <a href="http://www.cde.state.co.us/uip/UIP_TrainingAndSupport_Resources.asp">http://www.cde.state.co.us/uip/UIP_TrainingAndSupport_Resources.asp</a>.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>January 15, 2016</td>
<td>The school UIP is due to CDE for review on January 15, 2016 and should be submitted through Tracker. </thead>
<tbody>
<tr>
<td><strong>State Accountability</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>READ Act</strong></td>
<td>All schools that serve students in grades Kindergarten through 3rd Grade.</td>
<td>Currently serving grades K-3</td>
<td>Schools serving grades K-3 must include targets and strategies that address the needs of K-3 students identified as having significant reading deficiencies (e.g., instructional strategies, parent involvement strategies). Schools and districts looking for the CDE approved scientifically or evidence based instructional programs and professional development to support identified strategies may access the advisory lists at <a href="http://www.cde.state.co.us/coloradoliteracy/readact/programming">http://www.cde.state.co.us/coloradoliteracy/readact/programming</a>.</td>
</tr>
<tr>
<td><strong>Plan Type Assignment</strong></td>
<td>Plan type is assigned based on the school’s overall 2014 official School Performance Framework rating (determined by performance on achievement, growth, growth gaps, postsecondary and workforce readiness).</td>
<td>Priority Improvement Plan - Entering Year 3 as of July 1, 2016</td>
<td>The school has not met state expectations for attainment on the 2014 SPF performance indicators and is required to adopt and implement a Priority Improvement Plan. The plan must be submitted by January 15, 2016 for review. The updated plan must also be submitted to CDE by April 15, 2016 to be posted on SchoolView.org. Note the specialized requirements for identified schools included in the Quality Criteria document.</td>
</tr>
</tbody>
</table>

### ESEA and Grant Accountability

| Title I Focus School | Title I school with a (1) low graduation rate (regardless of plan type), and/or (2) Turnaround or Priority Improvement plan type with either (or both) a) low-achieving disaggregated student groups (i.e., minority, ELL, IEP and FRL) or b) low disaggregated graduation rate. This is a three-year designation. | Not identified as a Title I Focus School | This school is not identified as a Focus School and does not need to meet those additional requirements. |

School Code: 9496  
School Name: CASTRO ELEMENTARY SCHOOL
<table>
<thead>
<tr>
<th>Tiered Intervention Grant (TIG)</th>
<th>Competitive grant (1003g) for schools identified as 5% of lowest performing Title I or Title I eligible schools, eligible to implement one of four reform models as defined by the USDE.</th>
<th>Awarded a TIG Grant</th>
<th>In addition to the general requirements, TIG schools are expected to complete the TIG addendum that corresponds to the school’s approved model - Transformation. Note the specialized requirements for grantees included in the Quality Criteria document.</th>
</tr>
</thead>

Section III: Narrative on Data Analysis and Root Cause Identification

This section corresponds with the “Evaluate” portion of the continuous improvement cycle. The main outcome is to construct a narrative that describes the process and results of the analysis of the data for your school. The analysis should justify the performance targets and actions proposed in Section IV. Two worksheets have been provided to help organize your data analysis for your narrative. This analysis section includes: identifying where the school did not at least meet minimum state and federal accountability expectations; describing progress toward targets for the prior school year; describing what performance data were used in the analysis of trends; identifying trends and priority performance challenges (negative trends); describing how performance challenges were prioritized; identifying the root causes of performance challenges; describing how the root causes were identified and verified and what data were used; and describing stakeholder involvement in the analysis. Additional guidance on how to engage in the data analysis process is provided in Unified Improvement Planning Handbook.

Implications of Colorado Measures of Academic Success (CMAS) on Data Analysis: During the 2014-15 school year, Colorado transitioned from reading, writing and math TCAP assessments to CMAS PARCC English language arts and math assessments. These assessments measure related, but different content standards and are expected to have different proficiency levels. As a result, updating the data analysis this year (particularly the trend statements) may be more challenging. While the school’s data analysis is still expected to be updated, some modifications in typical practice may be needed. Refer to the UIP state assessment transition guidance document on the UIP website for options and considerations.

Data Narrative for School

Directions: In the narrative, describe the process and results of the data analysis for the school, including (1) a description of the school and the process for data analysis, (2) a review of current performance, (3) trend analysis, (4) priority performance challenges and (5) root cause analysis. A description of the expected narrative sections are included below. The narrative should not take more than five pages. Two worksheets (#1 Progress Monitoring of Prior Year’s Performance Targets and #2 Data Analysis) have been provided to organize the data referenced in the narrative.

| Description of School Setting and Process for Data Analysis: Provide a very brief description of the school to set the context for readers (e.g., demographics). Include the general process for developing the UIP and participants (e.g., School Accountability Committee). | Review Current Performance: Review recent state and local data. Document any areas where the school did not at least meet state/federal expectations. Consider the previous year’s progress toward the school’s targets. Identify the overall magnitude of the school’s performance challenges. | Trend Analysis: Provide a description of the trend analysis that includes at least three years of data (state and local data), if available. Trend statements should be provided in the four performance indicator areas and by disaggregated groups. Trend statements should include the direction of the trend and a comparison (e.g., state expectations, state average) to indicate why the trend is notable. | Priority Performance Challenges: Identify notable trends (or a combination of trends) that are the highest priority to address (priority performance challenges). No more than 3-5 are recommended. Provide a rationale for why these challenges have been selected and address the magnitude of the school’s overall performance challenges. | Root Cause Analysis: Identify at least one root cause for every priority performance challenge. Root causes should address adult actions, be under the control of the school, and address the priority performance challenge(s). Provide evidence that the root cause was verified through the use of additional data. A description of the selection process for the corresponding major improvement strategy(s) is encouraged. |

Narrative:

Castro Elementary School is a Title I Focus School of 528 students K-5 in the southwest area of Denver. 98% of our students qualify for the Free and Reduced Lunch Program. 11% of the population receives special education services. 71% of our students are English Language Learners. During 15-16 SY there was a decrease in enrollment from 619 students in 14-15 SY to 528 students in 15-16 SY.
Current administrative team is in its third year of leadership at Castro. The UIP process began 13-14 school year with the development of the UIP Plus. For SY 14-15, 15-16, school leadership team was involved in the data analysis, priority performance challenge, and root cause analysis updates. The School Leadership Team reviewed data and wrote root causes on chart paper and eliminated root causes that were outside the sphere of direct influence of the school and settled on root causes in which the school has direct influence.

Castro raised its School Performance Framework designation from orange to yellow (accredited on watch).

In all TCAP status measures, Castro raised its scores. However, Castro is still below district and state requirements. Reading was 38% P/A and 13% less than target goal. 41% P/A in Math and 15% less than target goal. 24% P/A in writing 13% below target. The percent of 3rd grade students scoring P/A on TCAP Lectura has been increasing between 2012 and 2014 from 28%, 47% to 79%. Castro performance exceeded district and state averages. The percent of 3rd students scoring P/A on TCAP Escritura has been increasing between 2012 and 2014 from 26%, 33%, to 73%. Castro performance exceeded district and state averages. All student subgroups improved their performance in reading, writing, and science.

Priority Performance Challenges identified are:

Castro’s MGP has remained relatively static for the last 3 years. Between 2012-2014, the overall MGP for Reading was 49.5 %ile, 52 %ile, to 49.5 %ile. For Math, overall MGP, for the same period it was 54%ile, 52%ile, and 50%ile. For Writing, the overall MGP between 2012-2014 was 48%ile, 44%ile, and 50%ile. Status has improved in the last year in Reading from 34% in 2013 to 38% in 2014, 40% in Math to 41% in Math, and 17% to 24% in Writing.

Root cause: Lack of grade level collaboration in lesson planning, lack of focus on standards, data driven instruction. This priority performance challenge was related to this root cause through processes between 2013-2014 and 2014-2015 school year. Castro used a consultant to build a UIP Plus 13-14 school year which led to weekly meetings with School Leadership Team (SLT), feedback from Critical Friend’s Review. This priority performance challenge and root cause were re-visited 14-15 school year with the SLT at Castro.

Reading was 38% P/A and 13% less than target goal. 24% P/A in writing 13% below target.

Low overall achievement in reading and writing.

Root cause: Lack of coherent, uniform schoolwide reading and writing programs (ie: Guided Reading Plus, and Every Child a Writer). For SY 14-15, the priority is to provide intensive professional development to all grade level teams on Guided Reading Plus led by network GRP specialist.

Data information, SPF information, priority performance challenges were shared/publicized with parents during parent meetings that have been held this year. Parents were encouraged to form a partnership with school to address our priority performance challenges and supporting their students. A total of 3 meetings have been held. Data was also analyzed with the School Leadership Team in October of 2014 to identify trends, priority performance challenges, and root cause.
Worksheet #1: Progress Monitoring of Prior Year’s Performance Targets

Directions: This chart supports analysis of progress made towards performance targets set for the 2014-15 school year (last year’s plan). While this worksheet should be included in your UIP, the main intent is to record your school’s reflections to help build your data narrative.

<table>
<thead>
<tr>
<th>Performance Indicators</th>
<th>Targets for 2014-15 school year (Targets set in last year’s plan)</th>
<th>Performance in 2014-15? Was the target met? How close was the school to meeting the target?</th>
<th>Brief reflection on why previous targets were met or not met.</th>
</tr>

</table>
**Worksheet #2: Data Analysis**

**Directions:** This chart supports planning teams in recording and organizing observations about school-level data in preparation for writing the required data narrative. Planning teams should describe positive and negative trends for all of the four performance indicators using at least three years of data, when available, and then prioritize the performance challenges (based on notable trends) that the school will focus its efforts on improving. The root cause analysis and improvement planning efforts in the remainder of the plan should be aimed at addressing the identified priority performance challenge(s). A limited number of priority performance challenges is recommended (no more than 3-5); a performance challenge may apply to multiple performance indicators. At a minimum, priority performance challenges must be identified in any of the four performance indicator areas where minimum state and federal expectations were not met for accountability purposes. In most cases, this should just be an update to the plan from 2014 since the SPF has not changed for 2015. Finally, provide a brief description of the root cause analysis for any priority performance challenges. Root causes may apply to multiple priority performance challenges. You may add rows, as needed.

<table>
<thead>
<tr>

Lack of school wide systems for effective planning for literacy and math.</td>
<td></td>
</tr>
</tbody>
</table>

The overall percentage of 3-5 students performing meets/exceeds
on ELA was 11.1% in 2014-2015. This is below the district average of 26% and the state average of 30%.

The overall percentage of 3-5 students performing meets/exceeds on Math was 11.5% in 2014-2015. This is below the district average of 15% and the state average of 25%.

CDE Improvement Planning Template for Schools (Version 7.0 – Template Last Updated: June 9, 2015)
Section IV: Action Plan(s)

This section addresses the “Plan” portion of the continuous improvement cycle. First, identify annual performance targets and the interim measures. This will be documented in the required School Target Setting Form on the next page. Then move into action planning, which should be captured in the Action Planning Form.

School Target Setting Form
Directions: Complete the worksheet below. Schools are expected to set their own annual targets for the performance indicators (i.e. academic achievement, academic growth, academic growth gaps, and postsecondary and workforce readiness). At a minimum, schools should set targets for each of the performance indicators where state expectations were not met; targets should also be connected to prioritized performance challenges identified in the data narrative (section III). Consider last year’s targets (see Worksheet #1) and whether adjustments need to be made. For each annual performance target, identify interim measures that will be used to monitor progress toward the annual targets at least quarterly during the school year.

Implications of Colorado Measures of Academic Success (CMAS) on Target Setting: During the 2014-15 school year, Colorado transitioned from reading, writing and math TCAP assessments to CMAS PARCC English language arts and math assessments. These assessments measure related, but different content standards and are expected to have different proficiency levels. As a result, setting targets based on the percent of students scoring proficient and advanced on TCAP is not appropriate. Furthermore, CDE does not yet know if student growth percentiles and median student growth percentiles will be available for accountability, planning or reporting use. It is known that adequate growth percentiles will not be available this school year for 2014-15 results. Target setting is still expected to occur in the UIP process during this transition period. However, some modifications in typical practice may be needed. Refer to the UIP state assessment transition guidance document on the UIP website for options and considerations.

Action Planning Form for 2015-16 and 2016-17

Directions: Identify the major improvement strategy(s) for 2015-16 and 2016-17 that will address the root cause(s) determined in Section III. For each major improvement strategy, identify the root cause(s) that the major improvement strategy will help to dissolve. Then, indicate which accountability provision or grant opportunity it will address. In the chart below, provide details about key action steps necessary to implement the major improvement strategy. Details should include the action steps that will be taken to implement the major improvement strategy, a general timeline, resources that will be used to implement the actions, and implementation benchmarks. Additional rows for action steps may be added. While the template provides space for three major improvement strategies, additional major improvement strategies may also be added. To keep the work manageable, however, it is recommended that schools focus on no more than 3 to 5 major improvement strategies.

Major Improvement Strategy #1: If we create and consistently implement a system of data-driven instruction, then there will be increased achievement.

Root Cause(s) Addressed: Lack of high quality systems and structures for school leaders, teachers, and staff to use data in the organization of students and instruction in reading, math, and writing.

Accountability Provisions or Grant Opportunities Addressed by this Major Improvement Strategy (check all that apply):

*Note: These two columns are not required to meet state or federal accountability requirements, though completion is encouraged. “Status of Action Step” may be required for certain grants.
### Section V: Appendices

Some schools will need to provide additional forms to document accountability or grant requirements:

- Additional Requirements for Turnaround Status Under State Accountability (Required)
- Tiered Intervention Grantee (TIG) (Required)
- Title I Schoolwide Program. **Important Notice**: The schoolwide addendum is one of several ways to document how a school is meeting the Title I schoolwide requirements. While schools operating a Title I schoolwide program must have a plan, use of the UIP addendum is optional. The Federal Programs Unit and the Improvement Planning Unit will be offering training in fall 2015 on schoolwide requirements and the possible pathways to meet those requirements.

#### Required For Schools with a Tiered Intervention Grant (TIG) that Selected a Transformation Model

Schools that participate in the Tiered Intervention Grant and selected the Transformation Model must use this form to document grant requirements. As a part of the improvement planning process, schools are strongly encouraged to weave appropriate requirements into earlier sections of the UIP. This form provides a way to ensure all components of the program are met through descriptions of the requirements or a cross-walk of the grant program elements in the UIP.

</table>
| Observation-based assessments and secondarily designed and developed with teacher and principal involvement. | TIG Addendum | Several observations during three different windows throughout the year. Additionally, kindergarten and third-grade teachers receive weekly observations and feedback.

Instructional Superintendent and his support team do weekly grade level observations and provide building leadership with descriptive feedback from their observations. |
|---|---|---|
| Describe the process for identifying and rewarding school leaders, teachers, and other staff who, in implementing this model, have increased student achievement and high school graduation rates. Include how staff who have not improved their professional practice, after ample opportunities have been provided, are identified and removed. | Section IV: Action Plan or Required TIG Addendum | Teachers and leaders receive a monetary stipend for achieving pre-determined UIP strategies and for improving the school performance framework designation and student achievement.

N/A at this time. |
